Free MovieDB Free Download

Free MovieDB Free License Key Free

Free MovieDb is a freeware application which allows you to manage your movie collection, add to it, save to CD/DVD, Back Up to CD/DVD, back up to Free MovieDb. Free movie database is optimized for use on your desktop. Fast running. Does not slow down your PC. Free MovieDb features: Search by actor, director, title, or IMDB

number.Search by movie attribute.Sort by Title, Year, (or) Rating, Date, and More.Add multiple movies to your Free MovieDb.Preview movies in list, and keep the list on the page.Add a link to your Free MovieDb on the desktop.Add a link to your Free MovieDb on the desktop.As a free download it is NOT for commercial use. This easy-to-use step by step application performs a rapid name conversion between a variety of character encoding standards (Unicode, ISO-8859-1, and ANSI). A special feature enables you to

convert any phrase or text in one encoding standard to another encoding standard. The app is very easy to use. Just choose the source and the target encoding. You can then convert a phrase or a whole document without going through any complicated steps. In the best-case scenario, the converted text will be identical to the original. The software supports more than 50 file formats. To add, compare, and convert files, the app uses a list of possible conversions. Let's face it...movie tags are no fun. Instead of randomly searching through a list of movies and

stuff, you'd rather find only the movies you're interested in. It's called rDevTag Plus and it's a small tweak to the built-in MovieMaker and the results are unmatched. Note the difference: This app is a bundle of two apps that work together as one: rDevTag and rDevTag Multi. Its goal is to simplify the process of finding and loading movie tags for your online browing sessions. This package will allow you to tag movies while browsing the web and sync those tags with your DVD library. You can use this tool to create a customizable list of movie tags for your web

browser. Then, you can load those tags into your DVD player or a media player application. This will make it easy to find movies you want to add to your collection. The free version has all the features of the pro version and it is fully equipped for professionals. The first three

Simplify movie database building with Free MovieDb Free MovieDb is a lightweight and fully featured database program which simplifies movie related data organization and look-up. Surprisingly enough, this application does not require installation, making it very portable. It is possible to copy all the program files to a portable storage unit and run Free MovieDb from there by double-clicking the executable. Additionally, it is also possible to copy the executable to a USB

flash drive and run it on any computer you have access to. Supporting an unlimited number of movies, the application enables you to search for and look for all sorts of information about movies and their actors on IMDB. For example, you can see the full name, runtime, release date, director, writer, language, a short description, as well as quotes, trivia and goofs regarding the movie. In other tabs, it is possible to view the full cast, and details regarding each actor, images, posters, backdrops and trailers (from YouTube or TrailerAddict.com).

It is also possible to take a look at some of the indexed bloopers, the U.S. Box Office (top 10) and a list of people born on the current date. All the information saved to your database can be exported in TXT, CSV and XML files. Beyond that, you can update the IMDB data, as well as back up everything automatically. Free MovieDB Screenshots: Free MovieDb Details: Version: 3.1.1 Type: Freeware License: Freeware File Size: 2.51 MB Date Added: 2015-10-25 Price: Free File Type: .exe Publisher: None Developer: None System
