You're not going to be able to see the differences between the 1- and 2-year-old brands, and for good reason. But if your baby is an especially voracious sponge, the 1-year-olds are just fine. Of course, they're not as good as the real thing, but the differences between the various. Field of the Invention The present invention generally relates to an antenna and, more particularly, to an antenna for portable electronic devices, such as mobile phones, laptop computers, personal digital assistants, global positioning system (GPS) devices, and so on. 2. Description of the Related Art With the booming of the portable electronic devices, the use of antennas to receive and transmit signals has become a trend. However, it is necessary to solve the following problems when an antenna with a simple shape is designed for the portable electronic devices. An antenna may be extended outwardly to be coupled with a ground object. However, as the extension increases, the volume of the portable electronic devices increases accordingly, which is not suitable for portable electronic devices. The portable electronic devices tend to be more compact than before. For example, the design of antenna for the mobile phones has been changed from the helical antenna to the retractable antenna. Generally, the mobile phone can be roughly divided into two parts, including a front cover
