Note Histograms are a powerful tool for finding out whether the color balance of an image is correct. For detailed information about using the Histogram, see the box on Correcting Vignetting. Adobe suggests that the best way to use this tool is to learn what the white (right) end of the bar represents and that the bright white end of the bar denotes pure white while the dark end of the bar indicates pure black. * **Adjustments**. Click the button in the upper-right corner of the Image window (Figure 1.2). The Adjustments button is a shortcut to the panel shown in Figure 1.3. Click the Adjustments button to access all the editing controls for your image. The Adjustments panel offers several different ways to change the appearance of your image. * **Layer**. Click the button in the upper-right corner of the Layers panel (Figure 1.2). The Layer menu offers a variety of ways to manipulate and edit your image, including changing its visibility (shown in Figure 1.3), creating new layers, and moving, duplicating, and merging existing layers. You can read all about layers in the box on Managing Layers (page 328).

Hasbro is coming out with an entirely new line of action figures. And while that may be great news for collectors of every variety, it's also quite possibly the worst thing they could've done, because the Star Wars action figures will come with a new accessory that the rest of us couldn't even fathom. You'll be able to head to any hobby shop and pick up a complete set of C-3PO and R2-D2 action figures, which come with three heads that will all slightly adjust to different expressions, for the knock-off price of $100. Just kidding, this isn't some kind of joke — that's the actual price for the toy line set to launch next month. C-3PO and R2-D2 action figures with three heads Star Wars collectors will be able to pay around $100 for this new line of figures Though some concerns have been raised about how this could affect the 3D conversion on the original models, Hasbro says it stands behind the product and that consumers won't need to worry about some kind of weird 3D-to-2D crutch or anything. The story being told on the official product page: "The fact that these action figures have three heads is not about dressing up the toys as technology – it was done purely as a way to promote a new initiative, and it's different versions of each character's face that will be featured in different photos and videos. "While we were working on the design and development of these action figures, we were thinking about ways that we could translate our brand with a new approach, and we're excited to offer this concept to fans who love Star Wars." The set will come with 30 different poses, including a letter to the editor, an argument, the option of a "bossy droid" look, a confused look, and a scream. C-3PO comes in black and white, and R2-D2 comes in his classic gray color — neither of them are configured to look like the bad guys. According to the official announcement, production on the line of action figures will start right away, and the first wave will be arriving at retail in December. It'll be interesting to see how this plays out — if Hasbro plans on setting a new standard for toy pricing — but for now the question

What's New in the Adobe Photoshop 2021 (Version 22.5.1)?

The Paint Bucket tool allows you to quickly fill in empty areas of an image. The shape created by the Paint Bucket can be filled with your own color, just like the original shape is. The Liquify tool allows you to distort shapes and make them more exciting. Its options include creating planes, bulges and bumps, warping patterns, and other general transformations of any shape. The Gradient tool allows you to create custom-drawn gradients. The tool allows you to create gradients of any length, shape, color, and size. The Levels tool lets you adjust the contrast and brightness of an image. The tool operates on a color wheel, where you move a slider across the wheel to adjust brightness. The tool also lets you adjust contrast, but the contrast adjustment affects both brightness and darkness, while the Levels tool only effects brightness. The Magic Wand tool allows you to select a region in an image, and make that region lighter or darker. The Lasso tool allows you to draw on an image, and automatically select all the pixels that are within the shape you created. The Masking tool allows you to create a selection of an image (such as a silhouette), so that you can create a new image from that selection. The Pencil tool allows you to draw on an image, filling it with color as you go. The Paths tool lets you trace lines in an image, like the outline of a drawing. The Pen tool allows you to create or modify lines in an image, including straight lines, circles, rectangles, and lots of other shapes. The Paint Bucket tool allows you to fill an empty area of an image with a color. The Smudge tool allows you to blend two colors together to create a new color. It is similar to the Dodge and Burn tools, which can be used to selectively lighten or darken an area of an image. The Spot Healing Brush tool is a smart healing tool that can quickly repair small areas that have been damaged. It automatically recognizes the color of pixels that match the color of the pixels in the area it is repairing. The Whirl tool allows you to create swirling patterns in an image. Effects Effects allow you to apply special effects to an image, including distortions, filters, and effects that mimic popular techniques such as watermarking, creating special effects with brushes, and creating patterns. The
