kimia analitik kuantitatif Download Ebook Kimia Analitik Kuantitatif. Kimia Analitik Kuantitatif kimia analitik kuantitatif. Download Ebook Kimia Analitik Kuantitatif.Q: Significance of this notation I've been reading up on elliptic curves and I found this notation in a textbook: This reminds me of the commutator, where  $a^{b-c}=b^{-1}ab^{-1}$  and  $\mathop{\mathrm{commutator}}(a,b)=ab-ba$  What does this notation mean? Thank you for your time. A: Short answer: It means the same thing as  $[a,b]=ab-ba$ , but with an extra "up to lower-order terms" qualification. Longer answer: First note that  $[a,b]$  usually denotes the commutator, and we have some common examples:  $[a,b] = \begin{cases} ab-ba & \text{if } b \in \mathbb{O} \\ a-b & \text{if } a=b \end{cases}$  and  $[a,b,c] = \begin{cases} abc-acb-bca+cab & \text{if } a,b,c \in \mathbb{O} \\ a-b-c & \text{if } a=b=-c \end{cases}$  So now, the upshot of all this is that  $\$ab-ba\$$  is the "purely group-theoretic commutator" of  $a$  and  $b$ , but that when we are talking about "terms at the highest order" we want to be able to handle a general commutator, not just  $\$ab-ba\$$ . (Note that the term "purely group-theoretic commutator" is not standard at all, but I have been
